

Cancer Prevention Study-3

Research today for a cancer-free tomorrow.

What if you could make it so just one family never had to hear the words “you have cancer?”

What if you could personally participate in research that could help determine factors that cause or prevent cancer?

What if that research ultimately leads to the elimination of cancer as a major health problem for future generations?

This year, you can be a part of this historic research effort by enrolling and encouraging others to enroll in the American Cancer Society’s third Cancer Prevention Study.

Enrollment will take place at the Relay For Life of East Orlando on April 18th from 7:00 p.m. – 10:00p.m.

Who can join the study?

Anyone between the ages of 30 and 65 years of age who has never been diagnosed with cancer and will commit to the study long-term.

How can you participate?

1. Come to the Relay For Life of East Orlando on Friday, April 18th, 2008 ... between 7:00 p.m. – 10:00 p.m. Enrollment will take 20 to 30 minutes.

All you have to do is complete a brief survey, provide a waist measurement, and have a blood sample (similar to a doctor’s visit) collected by a professional, trained phlebotomist.

2. After your enrollment, you will be mailed a more extensive survey to complete with questions related to medical history, lifestyle, and behaviors.

3. Every two years, you will receive a survey to update that information.

What else can you do?

Tell everyone you know about this one-time, historic opportunity to make a difference in the fight against cancer and celebrate the cancer survivors in your life.

For more information, visit www.cancer.org/cps3 or call toll free, 1-888-604-5888.

*“My mom is a two-time cancer survivor and I’m doing all I can to make sure my children don’t have to say that...I really, really believe this is part of the answer.”
